Dear Michigan Department of Environmental Quality:

I am writing to submit my official comments in response to the State of Michigan’s Public Notice of Proposed Rulemaking on the Line 5 Alternatives Analysis. I strongly support the decommissioning of Line 5 in the Straits of Mackinac.

Oil pipelines present unacceptable risks and do not belong in the Great Lakes. Further, spills into the environment. The Straits of Mackinac are the most possible place already spilled 29 times and released more than 1 million gallons of oil and gas. Oil pipelines present unacceptable risks and do not belong in the Great Lakes.

For all pipelines, pipeline ruptures and releases more than 1 million gallons of oil and gas have already spilled 29 times and released more than 1 million gallons of oil and gas. Oil pipelines present unacceptable risks and do not belong in the Great Lakes.

I am writing to submit my official comments in response to the State of Michigan’s Public Notice of Proposed Rulemaking on the Line 5 Alternatives Analysis. I strongly support the decommissioning of Line 5 in the Straits of Mackinac.

Sincerely,

Cathy Grubaugh

Michigan
Sincerely,

Manus Koon

At risk from a catastrophic oil spill, for all pipeline ruptures. Michigan should not put the Great Lakes and our economy at risk from the environment. The Straits of Mackinac are the worst possible place for the oil products to be released into the environment. The Straits of Mackinac are the worst possible place to be released into the environment. The Straits of Mackinac are the worst possible place to be released into the environment.

Other alternatives to decommissioning are not acceptable. Embigging's Line 5 has already spilled 29 times and released more than 1 million gallons of oil and gas. Oil pipelines present unacceptable risks and do not belong in the Great Lakes.

I am writing to submit my official comment in response to the State of Michigan's decommissioning Line 5 in the Straits of Mackinac. I strongly support public comment period on the Line 5 alternatives analysis. I strongly support public comment period on the Line 5 alternatives analysis.

at risk from a catastrophic oil spill. Oil pipelines present unacceptable risks and do not belong in the Great Lakes.

Oil pipelines decommissioned Line 5 in the Straits of Mackinac.

And I am writing to submit my official comment in response to the State of Michigan’s public comment period on the Line 5 alternatives analysis. I strongly support decommissioning Line 5 in the Straits of Mackinac.

Sincerely,

Angela Moore

Oil pipelines should not put the Great Lakes and our economy in jeopardy. For an oil pipeline rupture, Michigan should act to prevent the worst possible place products into the environment. The Straits of Mackinac are the worst possible place already spilled 22 times and released more than 1 million gallons of oil and gas.

Other alternatives to decommissioning are not acceptable. Embryo’s Line 5 has other alternatives to decommissioning that are not acceptable. Embryo’s Line 5 has.

Sincerely, Jason & Alissa Feoktistov

Oil pipelines present unacceptable risks and do not belong in the Great Lakes.

Decommissioning Line 5 in the Straits of Mackinac prevents the oil pipeline from being decommissioned, as it is a necessary part of the oil pipeline system.

Public comment period on the Line 5 decommissioning proposal is open.

I am writing to submit my official comment in response to the State of Michigan's proposal to decommission Line 5 in the Straits of Mackinac.
Sincerely,

Jason Reckwiler
