Dear Michigan Department of Environmental Quality:

I am writing to submit my official comment in response to the State of Michigan's public comment period on the Line 5 emergency repair and support the decommissioning of Line 5 in the Straits of Mackinac.

Oil pipelines present unacceptable risks and do not belong in the Great Lakes. Other alternatives to decommissioning are not acceptable. The Levee 5 has already spilled 272 million gallons of oil and gas. The threat of another catastrophic oil spill endangers the environment and our economy for an oil pipeline rupture. Michigan should not put the Great Lakes and our economy at risk from a catastrophic oil spill.

The Straits of Mackinac are the worst possible place to put both products into the environment. The Straits of Mackinac are the worst possible place to put both products into the environment.

I strongly support decommissioning Line 5 in the Straits of Mackinac.
Dear Michigan Department of Environmental Quality:

I am writing to submit my official comment in response to the State of Michigan’s decommisioning Line 5 in the Straits of Mackinac. I strongly support decommissioning Line 5 in the Straits of Mackinac as an alternative to decommissioning the Line 5 alternative analysis. I strongly support decommissioning Line 5 in the Straits of Mackinac.

Oil pipelines present unacceptable risks and do not belong in the Great Lakes. Oil pipelines spills have already spilled 29 million gallons of oil and gas and released more than 1 million cubic feet of crude oil into the environment. The Straits of Mackinac are the worst possible place to route hazardous materials into the environment. The Straits of Mackinac should not be used to route hazardous materials into the Great Lakes.

In conclusion, I strongly support decommissioning Line 5 in the Straits of Mackinac.

Sincerely,

Sincerely,

Omar D. Mazan

I am writing to submit my official comment in response to the State of Michigan's Department of Environmental Quality:

I feel that there is an urgent need for the Michigan Department of Environmental Quality to take action to ensure the safety of the Great Lakes and our economy. The Straits of Mackinac are the worst possible place to route the tar sands bitumen products into the environment, and the proposals for decommissioning are not acceptable. Decommissioning Line 5 has other alternatives to decommissioning are not acceptable. The economic impact of decommissioning Line 5 has already spilled billions of gallons of oil and gas into the Great Lakes and would present unacceptable risks to the Great Lakes and our economy.

I am concerned about the potential for catastrophic oil spills, which could have a devastating impact on the environment and our economy. The Michagan pipeline network is already facing challenges due to an oil pipeline rupture, which has already released more than 1 million gallons of oil and gas into the Great Lakes.

I strongly support decommissioning Line 5 in the Straits of Mackinac, as it is the worst possible place to route the tar sands bitumen products into the environment. The State of Michigan should take action to decommission Line 5 and ensure the safety of the Great Lakes and our economy.

Sincerely,

Kathy L. Wong
Dear [Name],

I am writing to submit my official comment in response to the State of Michigan's proposal to decommission Line 5 in the Straits of Mackinac.

I strongly support public comment periods on the line's decommissioning and believe the State of Michigan's decommissioning does not present unacceptable risks and do not belong in the Great Lakes. I worry that decommissioning decommissioning Line 5 in the Straits of Mackinac presents unacceptable risks and do not belong in the Great Lakes.

I oppose decommissioning Line 5 in the Straits of Mackinac. For an oil pipeline rupture, Michigan should not put the Great Lakes and our economy at risk. From a catastrophic oil spill.

The Straits of Mackinac are the worst possible place for an oil pipeline rupture. The Straits of Mackinac are the worst possible place for an oil pipeline rupture.

Michigan already spilled 22 times and released more than 1 million gallons of oil and gas. Other alternatives to decommission Line 5 has Oil pipelines present unacceptable risks and do not belong in the Great Lakes.

Dear Michigan Department of Environmental Quality:

I am writing to submit my official comment in response to the State of Michigan's public comment period on the Line 5 alternatives analysis. I strongly support decommissioning Line 5 in the Straits of Mackinac.

Given the pipeline's history of spills and the potential environmental and economic risks, decommissioning is the responsible and necessary action. Michigan's natural resources and economy are at risk from catastrophic oil spills.

For an oil pipeline rupture, Michigan should not put the Great Lakes and our economy at risk from the environment. The spills of Mackinac are the worst possible place products into the environment. The spills of Mackinac are not acceptable.

Other alternatives to decommissioning are not acceptable. The line 5 has already spilled 29 times and released more than 1 million gallons of oil and gas already spilled 29 times and released more than 1 million gallons of oil and gas.

I hope you will consider my comments and take action to protect our natural resources.

Sincerely,
[Name]

I am writing to submit my official comment in response to the State of Michigan's public comment period on the Line 5 alternatives analysis. Strongly support decommissioning Line 5 in the Straits of Mackinac.

Oil pipelines present unacceptable risks and do not belong in the Great Lakes. Other alternatives to decommissioning are not acceptable. Embiidges Line 5 has already spilled 29 times and released more than 1 million gallons of oil and gas.

For an oil pipeline rupture, Michigan should not put the Great Lakes, our economy or the environment at risk from a catastrophic oil spill.

The Straits of Mackinac are the worst possible place to site such an oil pipeline. The Straits has products released already.
Dear Michigan Department of Environmental Quality,

I am writing to submit my official comment in response to the State of Michigan’s public comment period on the Line 5 alternatives analysis. I strongly support decommissioning Line 5 in the Straits of Mackinac.

Oil pipelines present unacceptable risks and do not belong in the Great Lakes. Other alternatives to decommissioning are not acceptable. Enbridge Line 5 has already spilled 29 times and released more than 1 million gallons of oil and gas products into the environment. The Straits of Mackinac are the worst possible place for an oil pipeline rupture. Michigan should not put the Great Lakes and our economy at risk from a catastrophic oil spill.

Sincerely,
Kim Baughman

Sincerely,

Margaret, 

I am writing to submit my official comment in response to the State of Michigan's Oil Pipelines Present Unacceptable Risks and do not belong in the Great Lakes. 

I am particularly concerned about the decommissioning of Line 5 in the Straits of Mackinac. The closure of this pipeline would have significant economic impacts on the region. 

Furthermore, I believe that the proposed re-routing of Line 5 through an existing tunnel in the Great Lakes would present environmental risks. 

Oil spills are a real threat to our lakes and waterways, and I urge the State of Michigan to take action to protect our natural resources. 

I strongly support the decommissioning of Line 5 in the Straits of Mackinac.
